

# Uses of CCR System

**Russell Jackson**

**Coastal Hazards Program Coordinator**

**National Oceanic and Atmospheric Administration (NOAA) Pacific Services Center**

**USAID**  
FROM THE AMERICAN PEOPLE

## CCR System

- CCR Guidebook
- CCR Elements
- CCR Assessment Templates
- CCR Best Practices/Resources

**INTERVIEWS & DATA COLLECTION: CONSOLIDATED TABLE**

Benchmark & Good Practices	Source of Info	Information Gathered (secondary info, interviews, focus groups, etc)	Notes for follow up (e.g. contexts, info, gaps)
<b>A. GOVERNANCE:</b> Leadership, systems, and institutions provide enabling conditions for participatory management and community involvement with local government			
<b>A1</b> Community development plans and policies incorporate short-term and long-term goals and actions for achieving coastal community resilience.		<b>A1.1</b> Coastal hazards and associated risks are routinely assessed and evaluated by a cross section of the coastal community. <b>A1.2</b> Common vision for coastal community resilience has been developed. <b>A1.3</b> Vision for coastal community resilience is incorporated as specific actions in community plans and programs. <b>A1.4</b> Participatory decision-making systems guide community development consistent with resilience vision and goals.	
<b>A2</b> Basic services (i.e. water, transportation, security, etc.) are accessible to society provided by capable and transparent leaders and institutions as an enabling condition for building coastal community resilience.		<b>A2.1</b> Institutional capacity for basic service delivery is assessed with strengths and weaknesses identified. <b>A2.2</b> Risk reduction measures are incorporated into basic service delivery mechanisms. <b>A2.3</b> Critical facilities and infrastructure are operational for potential hazard events. <b>A2.4</b> Contingency plans exist to respond to hazard events.	

## CCR Uses

- Community Assessment
- Organizational Assessment
- Capacity Building
  - ◆ University Curricula
  - ◆ Training Programs
- Adaptation/Incorporation
  - ◆ Existing Assessment Tools and Frameworks
- Describing the National Enabling Environment
- Developing MOU / MOA
- Others...

 <b>US IOTWS COASTAL COMMUNITY RESILIENCE INITIATIVE</b> CCR IMPLEMENTING PARTNER: EXPRESSION OF INTEREST FORM	
The US IOTWS Program is in the process of confirming implementation strategies with organizations interested in becoming partners in the Coastal Community Resilience Initiative. To help us confirm next step, we would be grateful if your organization could complete and return this form by February 12, 2007 to Atiq Ahmed at <a href="mailto:atiqka@adpc.net">atiqka@adpc.net</a> and Stacey Tighe at <a href="mailto:stigtighe@cbn.net.id">stigtighe@cbn.net.id</a> , copying Peter Collier at <a href="mailto:pcollier@iotws.org">pcollier@iotws.org</a> .	
<input type="checkbox"/> <b>Name of Organization</b> <b>SurfAid International</b>	
<b>1. Is your organization interested in becoming a CCR partner organization? If so, how do you see your organization integrating and applying the CCR guide, framework and approach in its work and programming?</b>	
Yes. We are currently implementing a Community Based Disaster Management program in western islands of Sumatra. CCR framework looks like it will initially assist greatly in terms of: <ol style="list-style-type: none"> <li>1) Capacity / Vulnerability Assessments</li> <li>2) Identification of disaster mitigation activities linked to coastal management and livelihoods.</li> </ol>	
<b>2. Is your organization interested in nominating and committing organization members to participate in the February 26 - March 2, 2007 National CCR Training in Sri Lanka?</b>	
[Empty space for response]	
<b>3. If members of your organization participate in the February CCR national training workshop, will your organization commit to conducting and completing one or more CCR assessments and initiating one or more community action plans applying the tools and skills covered in the training?</b>	
As mentioned it is hoped that techniques will be incorporated into existing disaster management planning	
<b>4. Who and how many from your organization would you propose attend the five-day CCR training workshop in February and how would they be involved in conducting the community assessment and action plans and otherwise implementing the CCR initiative after the training is conducted?</b>	
1) Joseph Viandito - Assistant Program Manager, E-Prep	
<b>5. If your organization participates in the training as an implementing partner, would your organization be able to send one or more of your trained CCR team members to present assessment and action plan results at the Regional CCR Workshop in July 2007? (funded by US IOTWS)</b>	
[Empty space for response]	

## Use of CCR

- How does the CCR System fit into your domain (Coastal Management, Disaster Management, and/or Community Development)?
- **Institutional letter of interest** – you have now been introduced CCR, is your idea for implementing CCR still valid?
  - ♦ Should you do something different?
  - ♦ Should you be working with others (institutions, domains, etc.)?
